Cooking, Baking & Coffee

How our substrates are composed

The diagram (shown on the left) illustrates example of the most common structure for each product category.

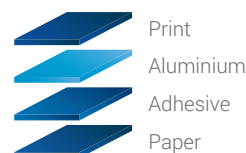

Food Containers

Lubricated aluminium containers. Bespoke heat resistant lacquering or print designs. Specific alloy properties for optimum machine productivity.

- Reel-fed container foil from 30 to 200 μ
- Epoxy lacquer/ink system available – full colour range
- Wrinkle and smooth wall alloys
- Food contact certified

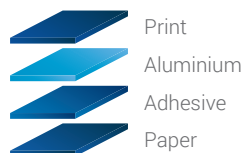

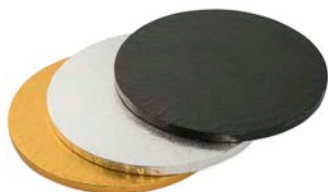

Crimped Cases

Lacquered laminate or paper crimp cases

- Reel-fed and sheeted material
- Paper/foil laminate or unsupported paper
- Rotogravure printing up to 8 colours
- Food contact certified

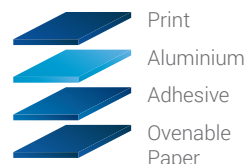

Cake Boards

Laminated and embossed material for lamination to cake boards

- Reel-fed or sheeted material
- Paper/foil laminate
- Emboss and print designs
- Food contact certified

Food Wrapping Substrates

Food wrapping materials (usually aluminium laminate) for heat retention in fast food markets

- Paper/foil laminate
- Grease proof and siliconized papers available
- Rotogravure printing up to 8 colours
- Food contact certified

Non-Stick Baking Foil

Special internally-developed non-stick coating for household foils, baking trays or other products

- Special internally-developed non-stick coating
- Reel-fed material that can be used on any kitchen foil and cooking tray
- Wide variety of gauges available (10 to 200 μ)
- General or bespoke emboss patterns available
- Withstands temperatures from -30 to 250C
- Non-stick coating available on both sides
- Non-silicone based solution
- Kosher and Halal compliant

Lidding Foil for Coffee Capsules

High-pressure and high-temperature resistant lidding foils including coffee capsules

- Reel-fed material (25 to 35 μ)
- Embossed and un-embossed
- Extremely high burst strength
- Heat-sealable to aluminium pots and various types of plastics including PS, PVC, PP, PE

Overview of Cooking, Baking and Coffee products range

Below is an illustrative overview of the basic product range for this market with available functional or structural options:

	Alu - unsupported	Printed Aluminium	Coated Aluminium	Alu / Paper Laminate	Alu / Film Laminate	Heat-seal option	Emboss
